

COLLABORATION & COORDINATION

AFIDEP has partnered with PATH Foundation Philippines, Inc. (PFPI), Leadership for Environment and Development (LEAD), Pan African Climate Justice Alliance (PACJA) and FHI360 to implement the BUILD Project and collectively contribute to the project results and intended impact.

At the regional level, the BUILD Project will work with stakeholders on both the FP/RH, environment, climate change sides and reinforce PED/PHE networks to expand the PED community practice. At national levels, the program will forge strong partnerships among policymakers, civil society organizations, and private sector actors to promote multi-sectoral approaches in development planning, financing and program implementation. The BUILD Project will also encourage universities to review and broaden their curricula by embracing PED integration in the training of the next generation of PED experts.

GEOGRAPHICAL LOCATION

Using a hub-and-spokes model, the BUILD Project has identified three strategic USAID FP/RH high priority countries and one member of the Ouagadougou partnership to serve as the hubs within our four regional areas of emphasis, in SSA and Asia: Kenya (East Africa), Malawi (Southern Africa), Côte d'Ivoire (Ouagadougou partnership, West Africa) and the Philippines (South East Asia).

The BUILD Project will be implemented in other USAID FP/RH priority countries and Ouagadougou Partnership countries where the USAID missions are ready to accept core funds or provide field support for proposed activities.

Building Capacity for Integrated Family Planning/Reproductive Health and Population Environment Development Action (BUILD) is a five-year project made possible by the generous support of the American people through the U.S. Agency for International Development under cooperative agreement number 7200AA21CA00002. The BUILD project is led by the African Institute for Development Policy (AFIDEP) (prime) in partnership with Leadership for Environment and Development Southern and Eastern Africa (LEAD SEA); PATH Foundation Philippines Inc. (PFPI); FHI 360; and Pan-African Climate Justice Alliance (PACJA).

BUILDING CAPACITY FOR INTEGRATED FAMILY PLANNING/REPRODUCTIVE HEALTH AND POPULATION, ENVIRONMENT AND DEVELOPMENT ACTION

(THE BUILD PROJECT)

FOR STRONG POLITICAL COMMITMENT, SUSTAINED FINANCIAL RESOURCES
AND ACCOUNTABILITY FOR VOLUNTARY FAMILY PLANNING AND
REPRODUCTIVE HEALTH

ABOUT BUILD

Building Capacity for Integrated Family planning (FP) and Reproductive Health (RH) and Population, Environment and Development (PED) Action (BUILD) is a five-year global project designed to leverage the interconnectedness of Population, Environment and Development, to spur strong political commitment, sustained financial resources, and accountability for voluntary family planning (FP) and reproductive health (RH) in low-and middle-income countries (LMICs).

BUILD seeks to amplify the PED approach to a new degree of transformative action across disciplinary, geographical, sociocultural and sectoral divides to achieve strong political commitment, sustained financial resources and accountability for voluntary FP/RH.

RESULT AREAS

1. Strengthened individual and institutional capacity in advocacy, policy communications and negotiations.
2. Increased commitment for cross-sectoral PED approaches which integrate population, health, environment, climate change, resilience, food security, water, livelihoods, economic growth, education, demography and governance.

Underpinning the BUILD project is the Systems Thinking Approach that will be deployed through the Drivers, Pressures, States, Impacts, and Responses (DPSIR) causal framework. DPSIR is a powerful tool for demonstrating the interlinkages between society, the economy, governance, and the environment. BUILD will also integrate demographic dividend (DD) in making the investment case for strengthening cross-sectoral benefits of FP/RH.

* Hub and Spoke is our schematic illustration of how we intend to expand the project through various platforms in the non-hub countries.
